
CBI-Hosted Project Sites

To help groups collaborate effectively during regulatory negotiations and many other types of multiparty collaborative efforts, CBI provides custom project websites and other web-based services. CBI offers these web-based services—including document hosting, web 2.0 collaboration sites, and more—to improve the efficiency of multiparty collaboration efforts, especially across large spans of geography or time.

These are two of CBI's many current projects. Click on the project page links to see an example of the web-based support which CBI can provide for collaborative projects.

Lower Neponset River Citizens Advisory Committee

CBI will facilitate the Citizens Advisory Committee, sponsored by the Massachusetts State Department of Conservation and Recreation and other organizations. [See project page.](#)

Raymark Superfund Site in Stratford, Connecticut

Since the fall of 1999, CBI has worked with the Town of Stratford, Connecticut, the U.S. Environmental Protection Agency (EPA), and the Connecticut Department of Environmental Protection (DEP) seeking to address the consequences of fifty years of the manufacturing of asbestos-lined brake shoes. [See project page.](#)
